

Prevents clog build-up while maintaining free-flowing drains with a thick-bodied formula that contains multi-cultured bacterial spores and free enzymes that cling to drainpipe walls, reducing organic waste build-up.

DIRECTIONS FOR USE:
SHAKE OR MIX WELL BEFORE USING.

TO REMOVE DRAIN BLOCKAGES: Pour 2 ounces of BIO-D into clogged drain. Its thickened formula will carry this unique product directly to the site of the stoppage. Allow drain to set undisturbed for at least 6 hours, preferably overnight. Flush drain with hot water for several minutes to loosen clog and restore normal drain flow. If flow is not completely restored, repeat treatment.

NOTE: BIO-D utilizes the digestive abilities of naturally-occurring bacteria to break up organic material (food waste, animal and vegetable fats and oils, undissolved soap residue) into smaller water-soluble particles. Bacterial activity will have little effect on clogs created by inorganic materials (plaster, film developing products, plastic articles). If you have a clog composed of these items, remove the inorganic matter first and use this product according to label directions.

Most drain clogs result from the accumulation of food materials on the inside of drain surfaces. Regular use establishes an active bacteria population that continuously works to keep this accumulation from occurring. Adding 1 ounce of BIO-D to drains once a week and allowing it to work overnight ensures that drains remain open. For drains that receive large amounts of organic matter (kitchens and garbage disposals), increase the dosage to 2 or 3 ounces once per week. Bleach, harsh detergents and disinfectants may kill bacteria. Allow several hours after using these products before adding BIO-D to your drains.

REX-BAC-T[®]

BIO-D

DRAIN OPENER / MAINTAINER AND BUILD-UP REMOVER

THICK BODIED FORMULA REDUCES ORGANIC WASTE

HIGHLY ACTIVE CONCENTRATE

CAUTION

May irritate eyes and skin. See side panel for additional precautionary instructions and first aid instructions.

CAUTION

May irritate eyes and skin. Avoid contact with eyes and skin. Use gloves and safety glasses when handling. Wash thoroughly after handling. Do not take internally. If in eyes, flush with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical assistance. If on skin, remove contaminated clothing and launder before re-use. Wash skin and hands with soap and water. If swallowed, give person several glasses of water and induce vomiting. Contact physician or poison control center for additional instructions.
