

DIRECTIONS

FOR RESTAURANTS OPEN 24 HOURS: Drip, pour or pump BIO-G directly into drains with BIO-PUMP during low flow periods, usually once during the day after lunch and once at night between midnight and 6 am. See chart below for daily dosage rates.

FOR RESTAURANTS OPEN FOR LUNCH & DINNER ONLY: Drip, pour or pump BIO-G directly into drains with BIO-PUMP between midnight and 6 a.m. See chart below for daily dosage rates.

FOR SINKS & FLOOR DRAINS: Use 2 - 6 ounces once per week, or 4 - 12 ounces bi-weekly during low flow periods. Use the highest dosage for drains that receive large amounts of organic matter.

DESCRIPTION

The continuous use of BIO-G drastically reduces plumbing maintenance costs and reduces pump-out frequency, making it the ideal grease trap maintainer. It utilizes the latest biological technology to keep grease traps and drain lines free from clogs and foul odors. The facultative bacteria offer greater continuous digestion while its spore-form allows it to resist chlorine, disinfectants and high water temperatures.

BIO-G also contains powerful special enzymes that immediately break down starch and complex carbohydrates to energize the bacterial replication of our five distinct bacterial strains. Unlike detergents that simply push grease into sewer lines, these bacterial strains work together to quickly and naturally degrade organic waste. This process not only eliminates greasy accumulations, but also helps eliminate obnoxious odors at the molecular level while a pleasant fragrance keeps traps and plumbing lines smelling fresh.

COMPLETE GREASE TRAP MAINTENANCE SYSTEM
BACTERIAL DIGESTANT FORTIFIED ENZYME SYSTEM
DUAL ODOR CONTROL
